Are you using SoftHSM?

Join us on October 24th!

The SoftHSM library is a reference implementation of PKCS#11. It was developed as part of the OpenDNSSEC project but is now used in many environments not closely related to DNSSEC. For some time, there has been no management or resources to support development of the code. It's time to change that.

We want to meet you and discuss how to proceed, hear about your usage, experiences and suggestions for improvements.

SoftHSM needs a reboot outside of OpenDNSSEC

We want to apply for funding so that we can support the open source community as well as develop support for missing features. PKCS#11 is changing and the world of cryptography is also moving forward, especially with a view towards post quantum crypto.

In order for us to succeed, we need a good estimate of the usage, organisations that can contribute and priorities for a plan for further work.

The meeting is on Zoom with details below. Looking forward to seeing you!

The SoftHSM reboot team

Benno Overeinder   *Jakob Schlyter*   *Olle E. Johansson*

Meeting details

- Topic: SoftHSM community meeting
- Time: Oct 24, 2024 16:00 Stockholm
- Join Zoom Meeting https://us06web.zoom.us/j/84819456621
- Meeting ID: 848 1945 6621
- Find your local number: https://us06web.zoom.us/u/kco0J5Ns9X
