

OpenDNSSEC Training

You are welcome to attend a free training course in OpenDNSSEC v1.2. It is a two-day training, where you get a mixture of theory and hands-on experience. This training will be held twice, so please select the date that you would like to attend.

Dates: 1-2 November or 29-30 November

Time: 09:00 – 16:30

Location: .SE, 9th floor, Ringvägen 100 A, Stockholm, Sweden

Registration: rickard.bellgrim@iis.se

RSVP before 28 October or 25 November

Agenda:

- Brief introduction to DNSSEC and the OpenDNSSEC application
- Prerequisites for running OpenDNSSEC and description of the lab environment
- Practical planning of your DNSSEC policies, based on three reference cases
- SoftHSM installation and initialization
- Configuration files for ODS, conf.xml , kasp.xml and zonelist.xml
- Files and folders used by ODS
- Running OpenDNSSEC
 - Sign a single zone
 - List keys
 - Export public keys
 - Roll a ZSK, manually and automatically
 - Roll a KSK
 - Signing many zones
- Monitoring the system with the Audit tool
- System administration
 - Backups
 - Key administration
 - Logging

Preparations:

Previous trainings had an extra full day of theory. This is now included and spread out over the two days. However, we do recommend that you watch the recordings of those sessions: <http://www.opendnssec.org/documentation/training/>
